Reef Trips and Fishing Trips

Special to note *Cnec longiraris*
Apr. 10, size + photo. ~~1/2~~
What has been in the line.

Apr. 10 foggy to row to deep hole
on reef for photos under water photog.
so went to mangrove grove, but I
stopped at sand flats first collected
algae of small jetty rocks got amphipods,
Eprathes etc. (from among green
algae primarily *Ulva*). Then worked
north of sand spit over which we
hailed boat in going to reef. →

The outboard was got to working this afternoon
after 1/2 days in capacity. It forced us on a
long row, performed by Desmond first and then
John, back to ship in smallest dinghy in which
one car lock lacked screws to hold plate to boat.
It kept jumping out and over had to be held down
by hand, → with air wt. Desmond, John, Desmond
and myself, and gear + specimens boat was
just few inches out of water + an occasional
wave did slope over in nasty high wind which
is usual here every day.

Had not reefed yet bent in
middle after I had the R.
Up great in sand then an
white change at the in
after noon

+ Mus Look

Apr. 11 Capt. [unclear] stayed in all night
Reading [unclear] No initiative
sitting on after deck, and he showed
initiative exploring cave while [unclear]
out were reading. First time [unclear]
left Jones and [unclear] on deck
with [unclear] just [unclear] away

Time came up for [unclear] to
find Capt. [unclear] gone. His
comment was [unclear] may be
only diary left that he
be collected other than [unclear]
self. Last night after
dinner [unclear] [unclear] did
not photo [unclear]

Apr. 11

Last night Darsie wanted to see Limbo dance, when I heard, had to dress I packed out so did John so Darsie rushed ashore to Crown Pt Hotel where Desmond had arranged. Sir Bus to enquire said we could go without ties but should have long trousers. So we went. The proprietor, Kurt Nottmager knew Busk and gave us all a free round of drinks. In fact 2, I bought 1 more

knew Busk; Plumers Island, Raymond Shannon; old man Schwartz; His sister knows Dowd of Pittsburgh. Had framed autographed pictures of Busk, had met family, boy girl & wife, whom he said went back to old country. Did not remember Banke

Mon Apr. 13. The photographers are all alike when they are invited primarily for photo ability (real or fanned) This a.m. Moss was reading and I asked him to stop cooking in galley by stove & get a fan.

He demurred did not like being disturbed at reading. Said (like Sexton) oh I've photographed him several times. I said yes, but in the galley. No, well I said I'd like to have on so/so he got up and got his flash and did.

April 16. Sits + stands around a great deal, but never
once has washed a dish or filled water bucket for
one but self. Also takes steps to get us new
see again. Took 2 larger hippos + 1 of
same of the... I mentioned seeing and
give full attention to women and her
I said fine one in special collection
Luffy to see well measured collection

Let chad in this way. I brought
first round 5m, the second
his still sitting on deck
Starting and in rock. He brought
back, right on time deck with hammer
ad old diesel, I said get old car
but under rock, he came back with
pieces, fragments I had a gift for him
when I spoke to him second time and
asked on canyon cover of boxes with
nothing before. Has a few cups
of. Most of it is he wants to take
him to box surprise of and I said
him to have it brought him to make
for passing time. He never did list of contents
of boxes in deck; never had up 70%
about hand in table; I always
replenished his stock. He made
dinner at 5pm. He had sweet after

What he himself needed the water
as we were having a few spaces
along. Only one did I ever see
his raft stuck of honey, cord &
cheap cloth & sciss. one left
on deck when used (some I sold).
Spoke several times of having bananas
I did not finally; could not find
nil of dredge on the ship this a.m.
at noon said where are they? Could
not find; I said they may have been
left in boat better go look; but
he just ignored remarks.
Also asked him to put out
dredge again for
which I had put in from to day
we did. At Buccoo reef
anchorage asked him to start stat
with sample with net at day
anchorage. At that time better was
too hard. but there is a guy at Buccoo
Id and one has been taken since
I started out again. (this is the

Here this am off Pigeon Id. Here
at 2 p.m. has not yet been done
until it be done. Here looks over
lands to see if ~~any~~ ^{any} have shifted
or need replacing or replacing ^{every} bit
handle, I go and each little
while (ever few days or so) but
he never sees need of any of it
even when he passes but that attracts
attention

Phot box face mark + smudge
have gone a little after a while

Apr 16 Here we are off to the Seign Place
to hit on Pades.

When I am around a little for bags, the hunter
helps himself, even running through
boxes for what he may think is the
most potent dope they had heard of and
and it was good and distributed (and
by him) before I got my bottle on; I was
landed

Apr. 15-16 The reef this side is
a headmark, large boulders lie
behind; sparse, coated with barn
and *Stictopora* ^{patula} *lancea* only
lensed are the flat but poorly populated
got first *hippos* on beach with *scorpa*
and *gob* to *lunge* for *hippos* but
they never came in (Apr. 15-16)

Mr. Carr Brown Reef visit.
Could not find pen, let it
go at that & go down
read book (a map of study *Russie*
took of *marinings* dredging left
sitting on boat after deck with *road* of
an *hippos* & *hippotes* beside it
lying on top of weed and water

Apr. 17 In Martinique Fort de France
Everybody rushed ashore. I wanted to go
around the harbor made to Bank for money
for Quin & change for ^{to} U.S. Shopping
was the great cry something to take home
Dinner didn't get in (to see Blanche
insect collection. Anne & I did all
as for Caput via Basse St. Blanches
Had nice buffet lunch there fortunately
In ~~am~~ & ~~the~~ ~~known~~ a lot of people in
common. I virtually could not hear or
really understand (had difficulty in following
Blanche) but Com. saved the day.

Blanche gave me two copies of 1956
publication one for me one for library
Desmond ~~brought~~ ^{looked} up Shalie I thought. It
proved to be Charlie ^{son of}
proprietor of grocery firm. He had a beer
with us and in his bright yellow truck & truck
wagon with iron seats took us to Museum but
too late to see exhibits closed promptly at 12 it
seems. Many new buildings in Fort de France
very modern, should have photo'd, only did
a couple of back streets. Went Market
dried inside shop bought jug (Vanilla beans and
cinnamon on sale). Wish I'd bought a little.

Any way invited Charlie to lunch with
us on ship. Lunch started before I changed
clothes and went with a very notified
Charlie who was busy with his mission

He furnished Darsie with
all meals + pins (10,000 ~~minutes~~)
He has some black catfish meat
in which he's kindly brought in
several specimens for fresh water
streams. He's awfully polite
but I don't get return then
promptly and if I do not do so
promptly he reminds me off it
from day to day. He's using one eye
for his small meals (now cottoned)
He's the guy who went through my
photo bag the day I let him look
it up for me for safe keeping +
next day asked me for spare film
I had in my photo bag too.
Can you hear it?

cultural. He was standing by when I got
up. Charlie had finished his first
helping and I offered him second and
gave him half remaining tuna etc. The
Darsie extended a plate to me, and I
said no you go first (the boys eat
like - and as there wasn't much on
plates, especially after I gave Charlie
some of what remaining on each plate.
Then I gave plate back to Darsie, and
said you go first, he said loudly I
don't see anything to eat. I said
here you take this tuna, and
I should a fair portion of his
plate, some onion, (he yelled) for I
didn't see him give him two slices
of tomato, all cucumber and cheddar
of lettuce and couple pieces of bread,
saying work has more of everything, he
got get it, so I did, and they can
get tuna + sliced tomato. Then I ate
a helping of tuna, Darsie took an ad-
ditional helping of same + I gave
Darsie on his plate, couple more slices
of tomato, after giving Charlie some
he had more helped Darsie got the 2 slices
was left. But regard seems to
be had by young fellow Darsie is 44
Appa + old Bowman for the money
after. I never saw him a bunch

paid by Desmond
 Dist: 2 B. weel
 gun B. weel
 beer.
 17.00 US
 2.00 US
 15.00 B. weel
 15.00 B. weel

for patching into food without
 thought of anyone but himself
 + Halverson short of disapproving
 ment, at food left for him to take
 has an insult. He must try when
 it runs out more is provided. +
 moreover he could have kept his mouth
 shut and made the best of what was
 left. It would at that time have been
 just ship meal he ever had around
 here, and would not have hurt him.

The American Consul was entertaining in-
 spectors (for State Dept. by case out
 to greet us. One of his girls included
 Mr. Blagden for me and we went around
 to see him. Overed to be latter of
 small boys who will be in
 flowerets Pt. this summer.

I said in starting to expose ourselves
 getting ready to go. "We should get now
 thing inspectors will be going through your
 desk drawers. He said they've been
 by through. He came out to see us
 in open 3'd floor court of Consulate.
 And went off gave a pass by his up
 just to market & buy shopping for his
 kids

I guess we got off at 2 p.m. as
planned — got in late afternoon
at Roseau (early evening
too late for clearance).

Hermond, has to pay for his
camera in Dominica (Rolliflex)
I think I'll get one too.

We are hardly north on reasonably
smooth sea, in lee of Martinique
and very quiet.

Desmond bought camera for me 17.

April 18

The Free Lance came into Portsmouth
 about 4 p.m. Had aboard a party of
 about 7 (2 was in mine for a long time
 on wire. Desmond went over to see me
 they served me a cold drink.

One man named Vaccin asked
 about English Clark, said he'd brought
 up about 4 gallons of formalin for her
 when he was working in the Red Sea
 and said he knew Kelly

April 20 aphone at Inupiat
got key about 20 to 12 when
thing closes. Rushed in to see
Administrator, robust tall
Englishman. He called Peter Lake
and the vestry officer. Latter
getting over ghostly flu. Inupiat
though Peter Lake said 130 to 200
for us to return. He did one drive
to dock before we went back to
hut & made all arrangements for
Caman; ~~the~~ told us to return at
at 2. He urged and finally
got lunch started at 12.00
to hut. Sube soon arrived told
us of his fish boat Capt.
George Roberts re Inupiat
fish

April 19 Sunday morning John & I
and pulled traps, one of mice most
peaceful morning yet. One rabbit
all rolled up in air, but only
150 lbs though not getting much had
in but a part of a 2 and a half
little red squirrel & 2(?) and a few
Saw a and a tall one early coffee

April

That day ago I rearranged all
April 20th I just now I showed
everything, this afternoon I am
ask

stayed while changing
alcohol and arranged
to have cases of
fresh bottles at hand
to have sitting on after
deck reading while
I washed bottles.

With out help
I am sure I am
doing it bet.
Whipple says
he has asked
an investigator
what had been
done

used quarts to be used again
but last evening he had used
but emptied out a little
supply carton on top deck with out
washing or removing them

Both Anne & I am are mad at me
After searching around and me

April 20 contd Robert story

April 20. Motors repairs etc
were n.g. beyond repair for
in gutter. Hardy said

Fox Bay beautiful place low
in middle wide expanse of black
sandy beach, many holes in it amphipod?
worms mollusks.

Amos got Ocyropsis. half doz. for photos

Boulders were bare, but got
amphipods from underside rocks. &
in coarse sand below

with poorly headlands of shale
like conglomerate at either end.
One sizeable algal patch about
a foot under water.

Lots of local residents bathing

Ideal place for resort hotel have air
strips.

Need push
net here

Apr. 22. Tho we got in early, we
could not get Harbor master and
finally Harlan Hanfkin got AFR
and me + Desmond went to Engl.
Hbr. Amos went ashore too.
Amoy when I went at 2:30 p.m. to
see Administrator, I ran into
Amos and noted him along + Hans
to visit "governor". He told us of a
Baptist Army Engineer, + showed
us the best spots for surveying. Amos
called the up + I went to see the
man. Amos after seeing admin-
istrator we went to Nicholson's office
across street where he made final
arrangements. Africa on Friday 1st
Tahiti on 4th May. Mon.

After I got back to Nicholson's
office Amos confessed to me he didn't
see a fly. but it was too late to see
Wynne. Dr. Amos took him to the
be thought he had ulcers but
kept them before. Th. thought
it bad news, Amos said he

Barnd had one since 20 yrs ago
ad also confessed he had hanta
passing urine, did you tell H. His
gun was no. Any way the Ld
L. came in for the test
on Thurs & Friday. Which cut
him out of flying to Barnd
with us. He spoke of flying
Friday if H. would let him.
I tried to discourage it. Said he
felt attacks as far back as martin
age but didn't tell Barnd had head
aches for last 5 days; etc.

Then went ashore at 8:30 to go
to hotel for next several nights
with cameras, & bottles (2 packs, heavy
as lead). Elvassie said he
had a shunt (a bad) attack just
before this & feared it would keep
him from going, told John

This August with a lot of RYD
 Amos I am sure would have not
 stayed behind if Dr. Radin had
 been in his place. Even if he
 came over later by plane to Dr. Radin
 I think it is a pretty little by
 being afraid to go to Dr.

It's last time I take any more with
this Certificate of O.K. to travel,
+ not to tell any body, except
Lennie Kerner of which type
time. + then not tell my in-
heart. or Lennie with its
hard new hospital.

hard men suspicious.
So there something were to
happen in an out of the way place,
make me madder all time when I
think of it, accepting free ride when
he might get rich at any time.
It has had his so selfish.

He was afraid to go to H. for fear
H. would not let him go on
trip.

Amos went ashore & left
no instructions re flash equipment
(his own & demand is against
to use Amos personal flash. He (Mes)
has one litre in

So I thought of using rubber
groate flash lamp holder &
buy camera then I'll sell
2 in a the day for us -

Pr. 24

107. Daily cave will always be impressive
for naturalists & nature lover, and every
cave visitor. Desmond measured the
edge to bottom and got 72 feet for measure
cord (Finlays no. 42) and tied rock on it
& let down, and tied ^{up} end to rest of coil, with
idea of pulling it down when he found it
helpful. He did & he pulled but coil dropped
into tall slender palm ^{crag} 40 feet up. Heavy
coil dropped into crag of palm so that
cord was practically smothered there, criss-
crossed among stems of leaves. Desmond
tugged & tugged & palm bowed & swayed
& bent but he got so finally had to back it
down with mallet and things tall 40-50 ft
and 5-6 inch in dia. was as tough as
~~new~~ wire nails, but finally it was through
but fell into tops of other trees and as
(it was heavy) ~~men~~ + later with Desmond
help had to work & lift base over rocks
and ~~was~~ it back till tree fell. It was
heavy as lead.

Heavy as lead.
Ch. of stalagmite Bud hole quite
in center. about wide and deep.

shred soil & debris into bags full
on ground (the big bags full of
part in which I was ~~excavated~~ ^{excavated}, for his
array.

Apr. 23 to Darby Cove 10 30
2/3 way by tractor! arr. noon

25. ¹⁵ Very successful shore all
all hands on lagoon B. while
I was in beach at 8 a.m. missed
us last night. Cut up sponge

Monday saw a ^{Soggy Head} hepard on me in
8 mos. was about X

He and Desmond after 4 p.m. did
dug in 1-2 mos off Caravan P.R. with
horgan.

Got George Smith a couple of small
spring lobsters. + 2 Lima

more than as just preventative

26. After an
all hands change
stayed around did not
(to keep and of run I will be)

Wrote to get
Flash light battery
asked for refill
got me a new last ball
batter
took my pen zinc
oxide home seen me
in envelope
note paper to Curran
for a
small home page 2

April 28 Left Barbuda 8^{am}. a. 27th
arr. off Eng. Bank at Daybreak, then went
on Dick's side.

All day harped on school coll. ~~the~~
saw around 11³⁰ till Desmond & Gray
started reefward then he & I went coll.
After this wings talked about how he had
to make up school coll. & I said if you
had collected more when you were out
collecting you'd have it by now. He
replied I gave you all I got! &
I said all we lost of you was
a large *Cult. anassa* (at Bueor
shore coll. in sand by mangroves
mean you never went equipped
to do extensive coll. (see mask
on ashle, & big one of our mud in ge)
got a *Phyll. esmer* on Bueor, which he kept
I was not particularly interested
got a dried under red sponge which
we never seen since it came aboard
I got 2 of my collecting, *Hippas* 2 larvae
of lot of 6 or seven, for photos & never
returned; when I said one fine ago it
would be nice if some one could catch
on water. He said he had a nice

27th last night tried use
just dirt net to try to get
couple of hammered organisms
in water at about 8 p.m. after
attention, we gave up went
behind leaning over railing
saw (edge of) starfish gang
across. (Damon to shipboard over.)
In just after mentioned it
I moved in when of triaffics.
being

28th tonight worked from 4
up. I had bucket of water in
deck. One worked over in it
dumped water over board. So I said
you might fill that again with
fresh water. Except for his own use
I don't believe I've ever filled it

collecting (which I have never seen) because
I said that it would make some
very pleasant Rummy.
that Amos does well. In fact, he
daring wouldn't fill a pint jar.
every thing included.
So couple of oysters for Tex B. as
by default, left in bucket on deck
about them in boat later in evening
when I pushed I'm now beginning to
hurry to for Amos. He (Amos) took
a pickled them, and got shirt, tucked
with black ^{put head} ~~down~~ ~~on head~~
on deck where it stayed another
day or two

After ret. from collecting I
said to Sam, you'll look after
damp collecting? He said yes but
he left Amos bucket undone
& unlabeled

I had told Sam weeks ago
in any body to put a tray on it & hang on
each time needed. So today I had

get hay (I fixed up, cartons it
is) for use (labels etc. which
which had been kept in it was
not there, so I asked him, was
on his hands, he'd get it, &
I went as I wished to wear
repellent clothing.

At night Desmond took
Larsie up to his room.

After dinner I wrote again tonight
w/ extensions of time to finish studies
(Cultures) I told him truths of his
things in truth & that he knew his
limits and should have planned
his work to fit; and that I should
have been told a nature of his
insect work, which he was very
to stick for himself at this (time of)
& suggested to write Thor and Bert
Rice, which he did by a very
sweet letter. Had got a very
letter head for which he asked me.

Under if I have to take ^{Photo}
at Rodney's house had only 3 used
in it,

2nd If Larsie had come
back promptly with hats for Rodney's
we could have finished off the
in afternoon, but there was no
way of reaching him.

Comrade told Anne secret of
long line is his fresh bait
with 3 meat stripes ^{as} bait
if of good sized, perfect strength
not ~~one~~ 1/2 hour in water, as value
increased. The more is to
state. Should be reference of

April 29 Bat Out day
Went this first time
did not turn out as well as we
2nd for 1 hr with Mrs. Nicholson

First time I got 5 of 12 bats
collected by party of 4 plus guide
Hansie & Son, little, Hansie
Hessman & I caught in all
net large one, two & small
from trap net 1 more than
sized nylon & traps also 3
I had 2 small 3 different for bats!

April 29th Sun. and

May 2nd Amos is queer as hell
This a.m. gave me a sealed en-
velope saying, "Here is an account
of my expenses and money left
over from advances." I then laid
his vouchers out to list of goods laid
+ we squared money back to
forth and about mining petty charges
and ~~bonuses~~ we planned a
little list [I owe him 13.00]
for an account but out of last note
why could he be frank. — I cut
open. Dave found him constantly
evading an answering never
direct answers questions but
to him, usually comes into another
or or ~~ass~~ remains beside the point.

May second this a.m. Anne
passed up eggs + had. As
healful I asked are you ill
are you hungry or are you
scurving affairs. "Oh no
this is something different." he
same aches and pains though.
Really has been of no use to
me since with mess little, he did
~~photo~~ ~~collect~~ ~~case~~ ~~was~~ ~~in~~ ~~relevant~~ and could
have been let go, because the
things he was requested to do
and didn't, were far greater of.
And to mess up picture about 5:30 p.m.
Saying it he felt too sick I would forget
~~and~~ ~~the~~ ~~request~~ the request.

Said he had pictures of the mud
and thought that of had wanted
above water pictures. I had
spoken of it at least three
times at meal times and he

him a fourth time man to man
as a picture I wanted to publish
with account. It seems success
with tube copied with his keen
powers of observation and interest
passed off and on all day have
only personal letters and again
to do.

Tom reads at night
when he is lying over head
of electric light fish. It has
Cowan who used hook and line
over steam and got mass of
hydrants. Also Cowan has
only one + fast one to help fine
root. Then why did Tom
take a band.

Had pain in a.m. These
sudden hard showers from
north while they last are
of altogether too short a duration
to have at least at this time of

year. My season job is but when
you do your picking on deck, can
be very interfering.

Weather continues lovely, rather
warm in day, here on water.
6:15 just had one of those hail
passing showers, last night 76 was
high low, and this am 6:15 = 78 in
yesterday was 88°. Rather cooler
in one time.

Hosmond went out and got
several unusual shrimp, and
a tail longer which did
taking these was beyond our
photographer.

Amos plans a book on
Crustacea as he's done for
fishes & and worms I can
see it in his attitude to the
side of job.

Apr. 11. Seine fish asked to put away, put
in qt jar. Asked it slit stomachs; no
said it ought to be done put 4 inch slit
in 8 inch fish; then tail stuck up above
jar rim $\frac{1}{4}$ inch perhaps on slant.
I said ought to be wrapped ^{in paper} in tank,

stuff he got day before yesterday on
hike with Darsie & Cawa still unlabeled
& untagged on 11th. Said it ought to
be labelled ~~said~~ replied it will be.
Leaves dishes usually where put
wraps formalin injected fish on deck
where formalin gets on deck I always
wrap in a bag to catch drip I say
After we got boxes done by
pumpacked I said we should
have list of contents; never
has been made.

What did Capt. think of sharp (needle-
like and glass \pm fragments of coral on
deck after cracking and sorting. I
thought he would down them as I did
whenever I stepped on one. But he
said "I'd call it an occupational hazard
wrapping formalin injected fish and
instead on in pain. I'd like to suggest
just not take when proposed though
may do later.

Reversible label (pad) or pcs masnite
screwed on; reverse to carry U.S. D. Bear
N.Y. Address:

Dredge with bottom that Latches
on & off for easy dumping. Wts that
bolt on like skis and various teeth.
Smaller than $\frac{1}{4}$ inch mesh. on

Small self contained wind & cable
small ^{auxiliary} engine mounted on same base

Lock box or folder into lock size
mach. lock which have to unlock.

Box with desk inside
Box with Tools & med. supplies
Aquarium box & pump & aeration?

Long equipment lock boxes
Aquarium tank and a dry hood
etc.

Bottle boxes, quarts (gallons?)
8 oz
milk

Jars 16 & 8 gal.

Safe, dissect - Babak,
